Writing Findings and Recommendations

Teacher answer key

A-B. Answers

A: 1 F; 2 R; 3 F; 4 R.
B: No. The record does not show why the trays were in that condition or establish a motive. A factual replacement is “Four trays contained tools in the wrong compartments.”

C. Fact-action links

No labels → add clear location labels to the six trays.
Wrong compartments → review the storage arrangement with students, return tools to the correct compartments and recheck the four trays.

D. Model Findings section

Twenty tool trays were checked. Six had no location labels. Four contained tools in the wrong compartments. The remaining ten trays were correctly labelled and organized.
Accept any three accurate facts; the total may count as a fact.

E. Model Recommendations section

Add clear location labels to the six unlabelled trays. Review the storage arrangement with students and recheck the four trays after the next session.
Accept other feasible actions explicitly linked to the observed problems.

F. Teacher check

Check numerical accuracy, neutral language, appropriate headings and evidence-action links. This worksheet covers two sections of a report, not a complete formal report.

Lesson connection: TTC Handbook V4.0, pp. 7 and 14-17; TC4, TC5 and the formal report structure. Tasks and keys are original classroom practice. Accept equivalent correct responses where appropriate.
